# MATISSE
Position Indicator

Redefine your elevator with a modern Position Indicator.

The Matisse is a high-resolution, fully networkable, and fully customizable position indicator that can integrate dynamic full-color backgrounds, news feeds, and widgets while also incorporating additional icons and elevator information.

Two-way video, Emergency Communication System, digital signage, and live video are also available.

Seamlessly Integrate:

- ✔ News & RSS feeds
- ✔ Time & Weather
- ✔ Stocks
- ✔ Scheduling
- ✔ Fully customizable
- ✔ Pictures & Videos
- ✔ HTML content
- ✔ Position Indicator
- ✔ Per-floor Messaging
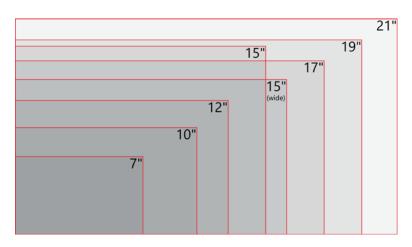

Create & Manage Your Content

Use the Cloud-based editor to create digital notices and signage from anywhere with an Internet connection. Preview and publish your content right away, or schedule your themes in advance. Content can include events, directories, images, RSS feeds, weather, news, videos, and custom HTML. All these features come included with your Matisse position indicator.

Manage all your digital notice boards from one browser login. With just a few clicks, schedule important notices days, weeks, or months in advance. You can do it all yourself, or delegate responsibility to other users.

MAD offers a variety of design services for those who don't have an in-house graphic design team or admin support available. Together we will create a passenger experience you can be proud of. For more information or to inquire about pricing and options, please reach out to designservices@madelevator.com.

Ask your sales representative which option is best for your elevator modernization project.

Mosaic Giotto is capable of custom background images up to 24 floors. For more than 24 floors, please use the Matisse.

The Matisse comes MosaicONE VMS ready and is designed to meet the requirements of A17.1/B44-19 and modified IBC code.

This system provides secure live video access to the inside of the elevator from remote monitoring stations and on-site personnel. In conjunction with the two-way messaging system, any authorized personnel can quickly assess and address the situation. For more info, visit madelevator.com/VMS
