GIOTTO SET UP FILE UPDATE GUIDELINES

This guideline is designed to help our customers with update of both their graphic and firmware file for the Matisse position indicators. It is a quick guideline that takes on average about 5-10 minutes to complete. Typically MAD creates unique programming for each job. You will have been provided with these files from a MAD team member. Please savethe files to a USB stick before proceeding.

TO UPDATE THE GRAPHIC FILE:

■ Power on the PI and plug in your USB stick
■ Using the menu button on the back of the PI, press enter
■ Select updates
■ Select the graphic menu
■ Select start graphic update
■ Select the appropriate update file you wish to use ending with extension ".miss"
■ Follow the on screen instructions

TO UPDATE THE FIRMWARE FILE:

■ Power on the PI and plug in your USB stick
■ Using the menu button behind the PI, press "enter"
■ Select "updates"
■ Select the "firmware" menu
■ Select "start firmware" update
■ Select the appropriate update file
■ Follow the on screen instructions
